

**METHOD FOR PROVIDING LOCATION INFORMATION OF A WIRELESS
COMMUNICATION DEVICE**

ABSTRACT OF THE DISCLOSURE

[075] A method (36) for providing location information of a wireless communication device (24) within a wireless communication network (20) calls for determining the coverage areas (26) of particular cell sites (22) through which the device (24) communicated during past calls. These coverage areas (26) are defined as the approximate location information for the device (24) and are provided to an authorized requesting party via a map-enabled web page (156).
